PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years of experience building and optimizing enterprise backend systems using C#, ASP.NET Core, SQL Server, Dapper, and REST APIs. Delivered production capabilities for software serving 1,500+ enterprise customers, including a government tax integration and performance improvements that reduced critical processing time by up to 78%. Experienced in database performance, legacy modernization, Clean Architecture, automated testing, CI/CD, Docker, and technical mentoring. Seeking backend or software engineering roles in Ireland where scalable systems, engineering quality, and measurable business impact are valued.

TECHNICAL SKILLS

Languages: C#, SQL, TypeScript, JavaScript

Backend & APIs: ASP.NET Core, REST API Design, Dapper, Entity Framework Core, Dependency Injection, Authentication & Authorization, Swagger/OpenAPI

Data: SQL Server, PostgreSQL, Query Optimization, Database Design, EF Core Migrations

Architecture: Clean Architecture, SOLID, OOP, Design Patterns, Layered Architecture, System Design, Microservices concepts

Quality & Delivery: xUnit, NSubstitute, Unit Testing, Code Reviews, Refactoring, Git, GitHub Actions, Azure DevOps, Docker, Docker Compose, CI/CD, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Backend Engineer (.NET)

Feb 2026 - Present

Chargoos

Tehran, Iran

- Lead design and delivery of scalable ASP.NET Core services for enterprise financial systems, from technical design through production deployment.
- Led backend implementation of a government tax-service integration, delivering 10+ new API endpoints that became a critical capability used daily across the customer base.
- Refactored a timeout-prone service through SQL query optimization and CPU-bound parallelization, reducing execution time from 90 seconds to 20 seconds in some high-volume environments.
- Partnered with infrastructure engineers to optimize a paginated repository method, reducing logical database reads by 50%.
- Mentor junior backend engineers through code reviews, onboarding, technical guidance, and maintainability-focused refactoring.

Mid-Level Backend Engineer (.NET)

Mar 2023 - Feb 2026

Chargoos

Tehran, Iran

- Developed and maintained RESTful APIs with ASP.NET Core for enterprise financial software serving complex business workflows.
- Designed and optimized SQL Server queries and Dapper-based data access for performance, reliability, and maintainability.
- Investigated and resolved production issues in large customer databases while collaborating with product owners, QA, frontend engineers, and technical leadership.
- Contributed to code reviews, technical design discussions, and incremental modernization of legacy services.

Junior Backend Engineer (.NET)

Chargoan

Sep 2021 - Mar 2023

Tehran, Iran

- Implemented backend features and authentication/authorization capabilities using ASP.NET Core.
- Resolved production defects, maintained enterprise applications, and improved software quality in collaboration with senior engineers.

Backend Developer Intern (.NET)

Chargoan

Jan 2021 - Aug 2021

Tehran, Iran

- Supported backend implementation, debugging, testing, and feature delivery using ASP.NET Core and SQL Server.

Windows Forms Developer (VB.NET)

Sarvak Drilling Services

Sep 2019 - Oct 2020

Tehran, Iran

- Developed and maintained internal Windows Forms applications and relational-database workflows that automated business processes.

SELECTED PROJECTS

PlannerApp | Open-source Full-Stack Planning Platform | github.com/iamalijafari/PlannerApp

- Built a production-minded bilingual platform that converts long-term goals into ordered yearly, monthly, weekly, and daily plans, with English/Persian localization, RTL layouts, and Gregorian/Jalali date handling.
- Implemented a .NET 9 ASP.NET Core REST API using Clean Architecture, dependency injection, application services, repository abstractions, EF Core 9, PostgreSQL 16, UTC date normalization, and deterministic due-date ordering.
- Developed a responsive Next.js 16 / React 19 / TypeScript frontend with Tailwind CSS and centralized API access.
- Established engineering quality with xUnit, NSubstitute, coverage collection, linting, type checking, production builds, multi-stage Dockerfiles, Docker Compose health checks, and GitHub Actions CI.

URL Shortener API | Backend Portfolio Project | github.com/iamalijafari/UrlShortener

- Designed a production-inspired ASP.NET Core Web API using PostgreSQL, Docker, Docker Compose, health checks, and Swagger/OpenAPI documentation.
- Applied Clean Architecture and automated CI with GitHub Actions, supported by comprehensive technical documentation.

EDUCATION

M.Sc. Biotechnology - Amirkabir University of Technology (Tehran Polytechnic)

Oct 2021 - May 2024

B.Eng. Chemical Engineering - University of Tehran

Sep 2016 - Sep 2020

CERTIFICATIONS & LANGUAGES

Certifications: CS50x - Introduction to Computer Science; CS50P - Introduction to Programming with Python; CS50AI - Introduction to Artificial Intelligence with Python (Harvard University / edX)

Languages: Persian (Native) | Turkish (Native) | English (Professional Working Proficiency)
